Our Roll-A-Door series is a revolutionary introduction for industrial and commercial applications. It features a number of significant benefits rendering higher standards of durability, performance and most importantly, operational ease.

TOUGH COLOUR FINISH

- The appearance of present day commercial and residential buildings often reflects the efficiency of their operations
- Optimum paint metal bond for low maintenance
- Compatibility with all modern cladding material
- Available in nine colour options
- Available in two variants

EASY OPERATION

- Balance loading & withstands very high overload forces without ill effect.

KEY FEATURES

All doors are custom made to suit individual openings. Our Roll-a-Door is fabricated using modern sophisticated technology using international standards and machinery.

- Pre-painted Galvalume sheets are used for fabrication of the curtain with tamper resistant joints leading to a high level of security
- These Galvalume sheets are bent on a 6-meter long special purpose press that makes multiple bends on one sheet giving greater strength to the curtain

- Operational Ease
